

Great Bear Log Homes Corryong House

Corryong, VIC
Australia

Located 120km off Albury-Wodonga near the upper reaches of the Murray River, is a hand crafted log and post beam home known as Corryong House. This picturesque home has been crafted using traditional full round logs as the main frame structure and then infilled with timber cladding and solid stone.

Quantum's GOLD Exterior coating was chosen for its penetrating transparent UV stabilised finish. The coating has a golden appearance and enhances the natural grain and hues of the timber without concealing the grain. In addition to being water and fungal repellent, the coating was an ideal choice to compliment the environmentally friendly and energy efficient home.

The end result is a magnificent home, that compliments the surrounding country landscape perfectly and effortlessly.
