

QUANTUM

TIMBER FINISHES

Environmentally Sustainable, Environmentally Responsible.

GOLD

A premium exterior, transparent, penetrating timber finish, to enhance the natural grain and hues of timber without concealing them. Final undertones tend towards a reddish gold.

Advantages

- Environmentally responsible - made from bio based, ecologically sustainable products.
- Non-toxic, low odour.
- Water repellent, helps to prevent the swelling and shrinking of the timber that causes cracking and splintering.
- UV resistant, contains UV absorbers.
- Mildew and fungal resistant.
- Touch up weathered areas as they occur, no need for a full recoat.

Typical Applications

Softwood - Exterior timber such as Cedar, Cypress, Oregon and treated pine. Excellent on broad surface areas and outdoor furniture.

Coverage

- New Timber May use up to 1 litre per 7m² per litre. First coat may use more depending upon the porosity of the timber.
- Old Timber May use up to 1 litre per 2m² per litre.

Note: GOLD is a saturation finish, not a surface coating.

Application Method

By brush, roller (short nap) or spray.

Good preparation is key to a professional looking, long lasting finish:

1. *New timber* – Power wash using SAP STRIP to remove all extractives and sterilise any fungus or mould. This will also help open up the timber and remove mill glaze to assist with penetration of the coating.
2. *Old timber* – Wash with DEX PREP and a strong jet of water to rid the surface of oxidisation (greying). Test adhesion in a small area.
3. Apply the first coat liberally to allow penetration, allow to dry.
4. Apply two more coats, allow 24-hour dry time between coats.
5. Spraying: Airless spray recommended. Use a 0.33 to 0.38mm (13 – 15 thou) orifice, 10cm fan (dependent on job) with a regulated pump pressure of 350-400 kPa (50 – 55 psi) tip pressure. Back brushing is
